

## Adding a user image

If you are registered user of the site, you can replace that boring black silhouette with a picture of your choice.

1. Click the My Account tab located in the upper left hand side of the page. You have to be logged in to see this tab.
2. After clicking the tab, your account information will be displayed. IN the account information pane, click the edit button.
3. Scroll down to picture portion, click the Choose File button, and upload your custom image. Be advised, if you upload a massive picture, it will not work, but you will get some archaic error message!
